## **DETAILED ACTION**

### ***Election/Restrictions***

1. Claims 3-5, 13-19, 21, and 24-32 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), there being no allowable generic or linking claim in Response filed 11 September 2003.

2. However, this application contains elected claims directed to the following patentably distinct species of the claimed invention:

(1) the specifics of a thin film transistor array device comprising a signal line and a pixel electrode comprising a first embodiment corresponding to Claims 1-2 and 6-12;

(2) the specifics of a thin film transistor array device comprising a gate line assembly, a semiconductor pattern, an ohmic contact, a passivation pattern, and a transparent electrode comprising a second embodiment corresponding to Claims 20 and 22-23.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over

the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
